

DECLARATION OF USAGE **NUK PREMATURE SOOTHER**

Dear Sir / Madam

Mapa GmbH, manufacturers of premature soothers and Artemis Brands their Southern African distributors are legally obliged to ensure that the use of their product (soothers for premature infants up to 1500g) does not cause any damage to health. Due to the fact that the premature soothers are smaller than soothers for healthy new-borns they could be taken into the mouth of an infant and in the worst case swallowed. This and other misuses of the product should be avoided.

We hereby agree to use the products in question with full knowledge of the possible dangers existing and to exercise caution and discretion in their use to exclude any health danger. The undersigned declare by signing this document that:

- The premature soothers will be given only to premature infants under strict supervision.
- The soothers will not be taken home by parents for their infants.
- The soothers will be disposed of after use to prevent further use by third parties.
- Any other misuse of the product will be excluded.
- Mapa will be informed of any accident resulting from the product without delay and advised, if changes to the product appear necessary.

The acceptance of these terms as per check box confirms the conditions under which Mapa and their Southern African agent Artemis Brands Products (Pty) Ltd. are prepared to supply the premature soothers and is not limited to a specific time period. Upon acceptance of terms client agrees to share contact details with Artemis Brands (Pty) Ltd. In order to be contacted in the future regarding feedback of usage of the NUK Medic Pro Premature Soother.
